

# SAFECOM

Presents

## Public Safety Communications Interoperability Conference

*Focusing on Effective  
Management of Radio  
Frequency Spectrum  
Resources*

*Radio frequency spectrum  
is a fundamental component  
of wireless communications  
networks. Learn how to  
effectively manage  
spectrum resources to help  
ensure reliable, cost-  
effective, and interoperable  
public safety  
communications  
capabilities in your  
community.*

*This conference will focus on —*

- Spectrum policy for public safety land mobile radio (LMR) networks
- Uses and characteristics of the public safety spectrum band
- Mission and goals of the White House Spectrum Policy Initiative Task Force
- FCC and NTIA spectrum management roles and responsibilities
- Effects of the NTIA and FCC narrowbanding mandates on the public safety community
- Commercial wireless services interference with public safety LMR networks
- And more!
